Café Custom Accessories

### A. ROUND BAR END MIRROR – SATIN BLACK\*

Complete the cut-down café bike look. These Bar End Mirrors provide a clean, streamlined look when compared to traditional mirrors. These round convex mirrors plug into the end of the handlebar to extend beyond the hand grip for an improved field of view on the bike equipped with narrow bars. When equipped with the Bar End Mirror Hand Grips (sold separately), the mirrors are simply inserted into the end of the grip and tightened in place. The mirrors are adjustable for maximum rear visibility, and can be positioned above the bar or, in some configurations, below the bar. When positioned below the bar, the left-hand mirror is used on the right, and the right-hand mirror moves to the left side. Includes hardware required to fit both 7/8" or 1" bars. Right and left mirrors are sold separately.

Fits stock or accessory handlebars on '15-'20 XG (except models equipped with Drag Bar P/N 55800225 or 55800238), '02-'17 VRSC™ (except VRSCF), '96-later XL and XR, '96-'17 Dyna® (except FXDLS), '96-'15 Softail® (except FLSTNSE, FXSBSE and '11-'12 FLSTSE) and '96-'07 Touring models. Designed for use with Bar End Mirrors, these stripped-down Hand Grips feature glueless installation that can be easily removed for service without damage. Grip End Caps are sold separately.

**56100199** For 1" Diameter Bar.

**A. REAR SET FOOT CONTROLS – SPORTSTER® MODELS**

Transform the on-street profile of your Sportster® model. Moving the foot controls to a rear-mounted location takes the riding position from a relaxed cruiser to a solo, aggressive, curve-carving posture. When combined with a Clip-On or Clubman Handlebar, the resulting hands-forward and feet-back profile drapes the rider over the bike and makes you feel a part of the machine. This complete gloss black Rear Set Control Kit includes everything you need to move the brake and shift lever to the rear passenger position. This unique kit maintains the standard 1-down and 4-up shift pattern, and can be installed with the Original Equipment low staggered exhaust system. Kit reuses Original Equipment rider footpegs. Installation requires removal of passenger footpegs and foot-peg mounts. For solo rider application only.

**50700040** Gloss Black.  
Fits '14-later XL883N, XL883L, XL1200CX, XL1200T, and XL1200X models and '18-later XL1200NS and XL1200XS models. Does not fit with Rail Collection Sprocket Cover P/N 34800032. Seating – Reach® & Tallboy®

### A. SUPER REACH® SOLO SEAT

Get a little bit closer. Super Reach® forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs closer together so that your feet rest firmly on the pavement. After hundreds of hours of on-road and ergonomic testing, the seat shape and foam density were selected as the ideal position for riders 5'-0" to 5'-4" tall. The Super Reach Seat moves the rider 1.5" closer to the controls compared to stock seat on XL883L model, and 2" closer and .5" lower compared to stock seat on XL1200C model. The nose is 1.0" narrower than the stock seat, and it is tastefully sculpted to look great with any size Sportster® fuel tank. The combination of premium textured and smooth vinyl surfaces and charcoal gray stitching and embroidered Bar & Shield logo really set the seat apart. For the ultimate solo touring setup, add the Quick Release Rider Backrest P/N 52300245.

**52000207**

There's something about the placement of the rider that makes the Café Solo Seat special. The one-up design features a high back pad that holds the rider in place and provides a direct connection to the bike. You sit "in" the bike, and your hands and feet reach naturally to the controls. The low-slung black vinyl-covered pad, the narrow nose and the tapered tail enhance the bike's sporting profile and pays homage to the heritage of the iconic Café Racer™ style.

How low can you go? This minimalist solo seat takes the stripped-down garage-built look about as far as you can go. The thick distressed black leather cover is bonded directly to the formed metal seat pan and minimizes the foam filler and the extra height it brings. The raw-edge leather pad is joined to the pan with brass rivets, and features matching brass "Milwaukee Since 1903" trim that will develop a rich patina with use. The Bar & Shield logo is embossed into the leather surface as a finishing touch. Easy to install, the bolt-on seat and a model-specific installation kit includes everything you need to get the bobber look. No cutting, welding or fabrication is necessary.

#### 52000279 Black Leather.

52000276 Black Diamond.

NOTE: Some Harley-Davidson® seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high-quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Protectant P/N 93600034 to protect your investment.

Seating

### E. ROAD ZEPPELIN® SEAT PAD

Experience ultimate comfort. Designed to ensure hours of comfort in the saddle, Road Zeppelin® Seat Pads are equipped with a unique air bladder system that allows your weight to be supported evenly across the entire seating surface. Whether you have a low-profile seat or a larger, more comfortable seat, you will feel the benefits. This air bladder system is designed to reduce pressure points, provide shock absorption and reduce vibration. Unlike other mouth-inflated seat pads, the Road Zeppelin Pad features an easy-to-reach integrated hand pump and metered air release valve that permits quick and controllable adjustment. You can easily adjust the comfort and support while seated on the pad. The UV-stable and snag-resistant mesh cover allows air to circulate beneath the rider's body, reducing the temperature trapped between the rider and seat. Shaped to conform to most Harley-Davidson® seats, the pads feature adjustable mounting straps and a non-skid surface to keep them in place. The hand-washable seat pad can be deflated and rolled for compact storage.

ENJOY THE RIDE

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

For shorter riders, consider tailoring your fit by changing to a Reach® Seat, Mid Foot Controls and lowered suspension height.

For taller riders, consider altering your ride by changing to a Tallboy® Seat and Tallboy™ Handlebars.

ESTABLISH YOUR POSITION AND FEEL

SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

## PREMIUM ADJUSTABLE SUSPENSION

Your motorcycle's suspension defines the riding experience. Fast starts, smooth stops and tight control in the corners are all part of the vehicle dynamics controlled by the tuning of the front forks and rear shocks. Screamin' Eagle® Fully Adjustable Suspension components let you dial-in the ride, whether you're cruising the highway, carving up a country road or dodging city potholes.

### 1 COMPRESSION ADJUSTER

Fine-tunes suspension to control the upward wheel movement when hitting a bump

Adjusts the speed at which the suspension compresses

Critical for balancing ride quality and suspension bottoming

### 2 REBOUND ADJUSTER

Fine-tunes the downward wheel movement after riding over bumps or potholes

Adjusts the speed at which the suspension returns from extension

Critical for balancing ride quality and suspension bounce

### 3 PRELOAD ADJUSTER

Critical to setting the proper suspension travel to soak up large potholes and absorb large bumps

Adjusts for rider sag—the amount the suspension drops under the weight of the rider and cargo

### A. SCREAMIN' EAGLE® FULLY ADJUSTABLE FRONT FORK KIT\*

The forks are completely adjustable to match your individual riding style. Set the sag with the adjustable preload then fine-tune the response with adjustable compression and rebound damping. These forks not only perform great, but also add a performance look with the exposed anodized adjusters.

#### 45400176

Fits '04-later XL883, XL883C, XL883R, XL1200V, XL1200R, and '04-'10 XL1200C models. Also fits '10-later XL883N and '11-later XL1200C/CA/CB/CP models with the additional purchase of Screamin' Eagle® Piggyback Shocks P/N 54000125, Jiffy Stand P/N 49722-08BHP and appropriate front brake line.

Non-ABS Diamond Black.	<b>41800413</b>
ABS Diamondback.	<b>41800416A</b>

### B. PREMIUM RIDE EMULSION SHOCKS\*

These fast shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. With the addition of urethane bumpers, you get a controlled ride and minimized bottoming harshness. Kit includes left and right shock and preload adjustment spanner wrench.

#### 54000077

Low-Profile. Fits '04-'15 XL models (except XL883, XL883R, XL1200R and XL1200T).

**\*WARNING:** Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

## Foot Controls

### SPORTSTER® FOOT CONTROLS

A long stretch to the controls or a knees-high cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tailbone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Many Sportster® models can be equipped with the following foot control configurations:

#### MID CONTROLS:

Original Equipment on some models, Mid Controls position the feet below the knee for a sporting riding posture.

#### STANDARD FORWARD CONTROLS:

Places the legs for a "feet-in-the-wind" laid-back profiling posture.

#### FURTHER FORWARD MID CONTROLS:

Achieves a comfortable foot-down riding position for the taller rider.

### E. STANDARD FORWARD CONTROL KIT\*

Add the stretched-out look and extended riding position to your Sportster model. The complete kit includes all hardware necessary to convert your Sportster model from mid controls to forward controls. Available in your choice of finishes, these forward controls add style and long range comfort. (Footpegs and shifter peg not included.)

Fits '14-later XL models. Requires separate purchase of stock or accessory rider position footpegs with wear pegs that fit '14-later XL1200 models.

**50700020** Chrome with Black Peg Bracket.

**50700021** Black.

Fits '06-'13 XL models with mid-controls (except XL1200CP and XL1200CA). XL1200L requires separate purchase of footpegs P/N 33134-07CAZ and 33135-07CAZ.

**33395-06A** Chrome.

**33397-07A** Black.

### F. FURTHER FORWARD MID CONTROL KIT

Feel a little cramped when your feet are placed on the standard-location mid controls? This kit repositions the controls 3.0" forward of the stock location, eliminating the "knees-high" riding attitude while maintaining a sporty upright riding posture. The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes control mounts, brake and shift levers, brake rod, mini-footboards with wear pegs and all hardware necessary to convert your mid or forward control-equipped Sportster model.

**50700028** Gloss Black.

Fits '14-later XL models.

### G. REAR SET FOOT CONTROLS – SPORTSTER MODELS

Transform the on-street profile of your Sportster model. Moving the foot controls to a rear-mounted location takes the riding position from a relaxed cruiser to a solo, aggressive, curve-carving posture. When combined with a Clip-On or Clubman Handlebar, the resulting hands-forward and feet-back profile drapes the rider over the bike and makes you feel a part of the machine. This complete gloss black Rear Set Control Kit includes everything you need to move the brake and shift lever to the rear passenger position. This unique kit maintains the standard 1-down and 4-up shift pattern, and can be installed with the Original Equipment low staggered exhaust system. Kit reuses Original Equipment rider footpegs. Installation requires removal of passenger footpegs and footpeg mounts. For solo rider application only.

**50700040** Gloss Black.

Fits '14-later XL883N, XL883L, XL1200CX, XL1200T, and XL1200X models and '18-later XL1200NS and XL1200XS models. Does not fit with Rail Collection Sprocket Cover P/N 34800032. For use with solo seat application only.

Installation of Rear Set Controls requires removal of passenger foot pegs, therefore removal of the Original Equipment two-up seat and installation of a solo-only seat is required. See your Dealer for solo seat options.

**\*WARNING:** Do not use highway pegs under normal stop and go operating conditions. Doing so could result in death or serious injury.

**\*WARNING:** Installation of accessory Forward Control Kits may affect cornering clearance. This could distract the rider, causing loss of control, resulting in death or serious injury.
